

Interested in research grants, studentships or collaborations?

Lecture Room 4, Riddell Hall, 11-12:30 24th March 2017

The Queen's University Centre for Health Research at the Management School (CHaRMS) are holding a roundtable workshop event to identify teams of researchers who could work together to obtain research studentships or grant funding.

We will have short presentations from

- Postgraduate Research Support to provide an overview of different research studentship funding available and application deadlines
- Dr Julie McCarroll from the Public Health Agency to provide an overview of current and prospective funding
- John Mullahy (co-editor of *Health Economics*) to indicate hot topics

Then it's over to you. We will have a roundtable interactive discussion to identify potential research ideas and collaborations.

You should think in advance of where you would like to go with your research, what type of researcher you would like to collaborate with and any studentships or funding streams you are especially interested in.

We would like you to leave the workshop having identified new colleagues you can work with.

Refreshments will be provided after the event.

If you are interested in attending can you please inform me at declan.french@qub.ac.uk.

Please feel free to circulate this invitation to anyone else in your institution who may be interested.

Best wishes,
Declan French,
Co-Director of CHaRMS

John Mullahy is Professor of Health Economics in the Department of Population Health Sciences, Affiliate Professor at the La Follette School of Public Affairs, Co-Director of the Robert Wood Johnson Health & Society Scholars Program, and Co-Director of the NIMH training program in Health and Mental Health Economics, all at the University of Wisconsin-Madison. He is also Honorary Professor of Economics at NUI Galway and Research Associate at the National Bureau of Economic Research. He currently serves as Co-Editor of *Health Economics* and is a member of the editorial board of *Health Services and Outcomes Research Methods* and *International Journal of Health Economics and Management*. He was formerly Associate Editor of *Journal of Health Economics* and was previously guest editor on *JRSS-A: Regional Science and Urban Economics: Empirical Economics* and *Economic Modeling*.
